# FLEX TUBES

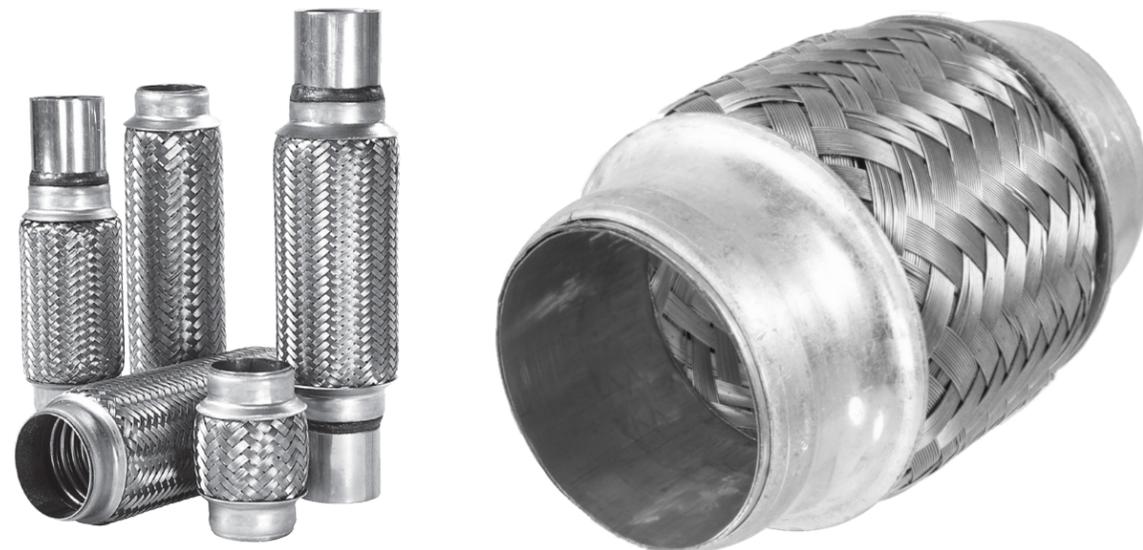

## COMPLETE COUPLING COVERAGE

Offered in a wide range from 1.75" to 3" diameters, you are covered for all the most popular automobile and light truck applications with increased flexibility that reduces vibrations. Our flex product is also available with inner braids and expandable tube ends on most part numbers to ensure a great fit.

## HIGH QUALITY MATERIAL

Our flex tubes are manufactured using only high quality grade stainless steel inner braid for a worry free quiet performance.

# GLADIATOR PERFORMANCE MUFFLERS

Gladiator performance mufflers are engineered to reproduce the sounds desired most in today's performance exhaust products.

Most popular sizes and designs available.

# PERFORMANCE EXHAUST TIPS

**Make a bold statement.**

Our selection of specialty exhaust tips will make your vehicle stand apart from the crowd in all the right ways.

## STAINLESS STEEL

Our quality and performance meet or exceed Original Equipment Manufacturer specs. We have a strict adherence to the proper chemical technology (loads) that deliver consistent and highly efficient loadings for lower cost with better converter efficiency.

## ROLLED EDGE

Our quality and performance meet or exceed Original Equipment Manufacturer specs. We have a strict adherence to the proper chemical technology (loads) that deliver consistent and highly efficient loadings for lower cost with better converter efficiency.

## BLUE FLAME

Our quality and performance meet or exceed Original Equipment Manufacturer specs. We have a strict adherence to the proper chemical technology (loads) that deliver consistent and highly efficient loadings for lower cost with better converter efficiency.

# ALUMINUM UNIVERSAL MUFFLERS

from Original Exhaust Manufacturers

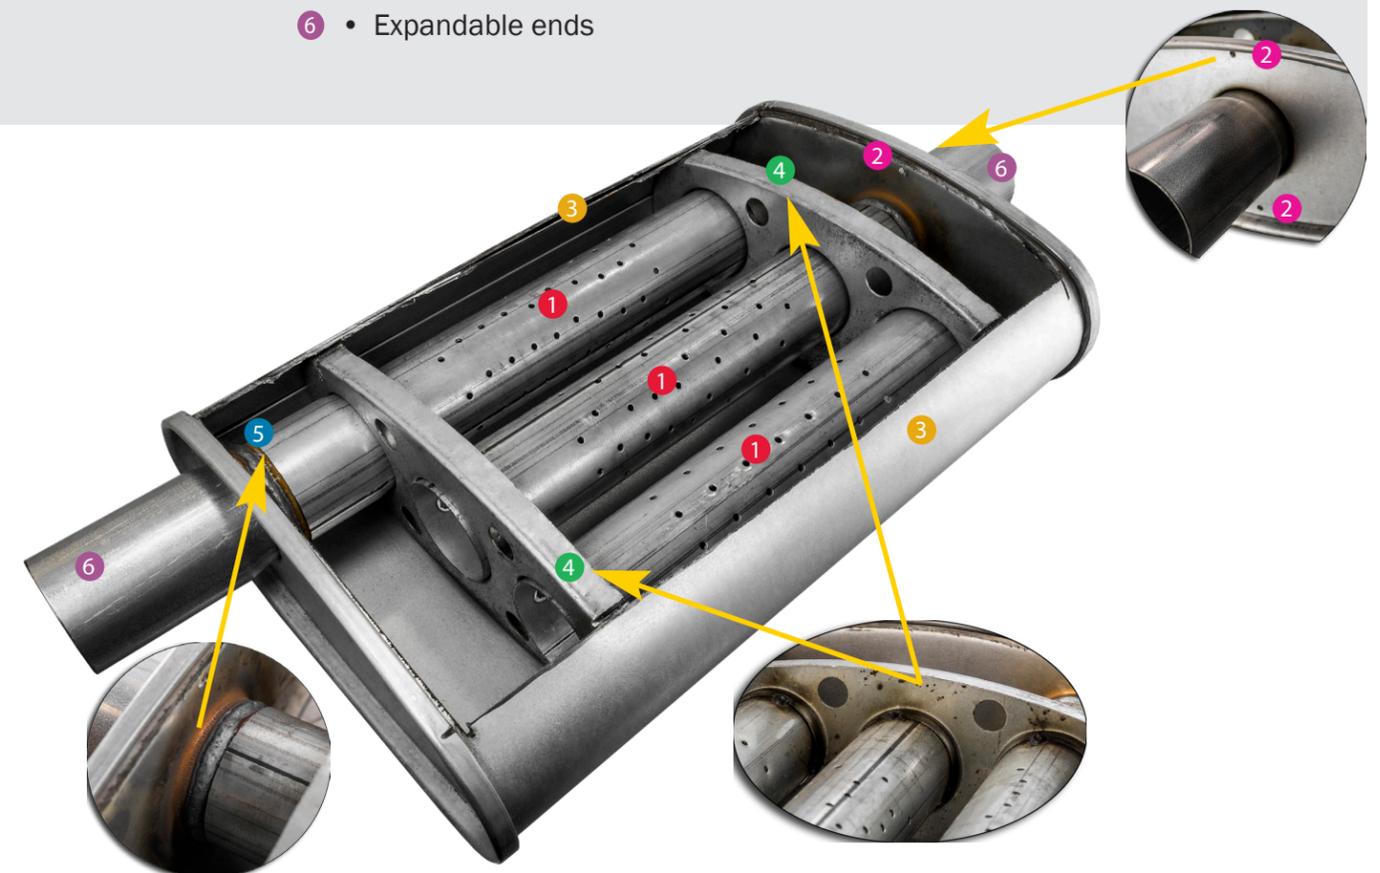

## BENEFITS

- Universal mufflers engineered for longer life
- Improved exhaust flow and quiet operation
- Reversible
- 100% aluminized

## FEATURES

- 1 • 3 Perforated pipes (16 gauge) — no pipe size reduction for ultimate flow
- 2 • Engineered weep-holes to extend muffler life - reduces condensation
- 3 • Double wrapped shell
- 4 • Double baffles for quiet performance
- 5 • Interior welded neck to prevent leakage
- 6 • Expandable ends

# CATALYTIC CONVERTERS

from Original Exhaust Manufacturers

## QUALITY AND PERFORMANCE

Our quality and performance meet or exceed Original Equipment Manufacturer specs. We have a strict adherence to the proper chemical technology (loads) that deliver consistent and highly efficient loadings for lower cost with better converter efficiency.

## COMPETITIVE PRICING

The Original Exhaust Manufacturers converter program offers a competitively priced direct fit alternative to the higher priced majors without compromising quality.

## RESEARCH AND DEVELOPMENT

Momentum is committed and determined to stay ahead of the growing market segment in all key metrics with focus and investment. Flexible and efficient manufacturing help make our converters highly competitive.

# WELDED ASSEMBLIES

from Original Exhaust Manufacturers

## INDUSTRY EXPERIENCE

We have more than twenty-nine (29) years of experience in Computer Numerical Control (CNC) tube bending, design and manufacturing. Our direct fit all-aluminized pipes are produced to match and interchange directly with most major automotive aftermarket manufacturers.

## VERSATILE CAPABILITIES

Our CNC tube bending and welding capabilities are versatile to support other industries requiring the equipment and skills we possess. Our welded assemblies cover a wide range of both domestic and import vehicles.

## THE RIGHT FIT

Manufactured and assembled in the United States (Hopkinsville, Kentucky), these quality systems will bolt up to (and interchange easily) AP, Walker, Arvin and many other common systems. Each system is vehicle tested before being released for sale. With consistent quality control checks throughout the manufacturing process, you are assured the right part and the right fit every time.
